

Minerva Platform Powering Largest IP Television Deployments in Canada and Latin America

TELUS and Telefonica del Sur now offering IPTV services to over 100,000 subscribers

Santa Clara, CA — May 26, 2009 — Minerva Networks, the leading provider of open and scalable IP-connected television delivery platforms, announced today that TELUS (www.telus.com), the leading telecom operator in Western Canada, and Telefonica del Sur (www.telsur.cl), the leading telecommunications operator in Southern Chile, are enjoying rapid subscribers growth and are now featuring the largest IPTV deployments in Canada and Latin America respectively.

Both operators have deployed Minerva's iTVManager platform to deliver premium digital entertainment services. Minerva's iTVManager is a comprehensive software platform for the delivery of next-generation IP-connected television services, including high-definition television (HDTV), personal video recording (PVR), whole-home digital video recording (WH DVR), pay-per-view (PPV) and video-on-demand (VOD). The Minerva platform also offers a robust set of APIs that enable third-party developers to integrate and deploy the latest communications and entertainment applications.

"We are leveraging the Minerva platform to deliver next-generation TV services to a rapidly growing subscriber base," explains Ibrahim Gedeon, Chief Technology Officer for TELUS. "Minerva iTVManager provides the reliability and flexibility we need to enable differentiating services."

TELUS and Telefonica del Sur's programming ranges from standard national television line-ups to specialty sports, culture, movies, kids' entertainment, as well as commercial-free radio channels. Consumers also enjoy high-definition TV, PVR, VOD, Caller ID display on their TV screens and a host of special features which differentiate their offers vis-à-vis legacy cable TV services.

"Minerva's iTVManager combines a complete set of intuitive subscriber applications with a highly scalable back-office service management platform," stated Jorge Atton, CEO, Telefonica del Sur. "By working with Minerva, we were able to scale our services faster than we expected and within budget."

Combined, the two companies are installing over 25,000 new IPTV set-top boxes every month.

"Minerva is proud to be a close partner of the leading IPTV operators in Canada and Latin America," stated Mauro Bonomi, CEO of Minerva Networks. "TELUS and Telefonica del Sur are enjoying great customer traction for their triple-play offerings. We look forward to working closely with them as they set new standards for television services."
